Features/Benefits

- Dual 2.3 amp USB ports
- Compatible with all USB-charged devices
- Rugged, one-piece over-molded design
- Portable and light-weight
- USB 3.0 hand-shaking between Nugget and device delivers maximum allowable current
- **Designed, tested and manufactured in the USA**

Description

Smart phones and tablets are now being used by soldiers as part of their daily combat routine. One challenge they face is the ability to charge these devices on the move or at forward operating bases where available power is limited.

Meeting the challenge to reliably charge these devices when a source of AC power is not available, the Nugget is a soldier-carried device that quickly converts a BA-5590 or BB-2590 battery into a multiport USB charging station.

The USB Power Adapter gives the soldier all the options needed to keep portable electronics fully charged in an easy-to-use, lightweight, rugged product. The key ring allows the soldier to attach it to their tactical vest and also makes removal from the battery easy.

Recharge your portable devices with our USB Power Adapter
